

**MOTOTRBO Products in “Model Class” DP4801 for DMR Interoperability Testing - Certificate 2014-005
Tier II RadioActivity SYS and Motorola MS**
DMR Association definition of a Model Class (Section 1.3.13):

“A set of products that a manufacturer has determined, through engineering analysis or internal functional testing, to be functionally equivalent” *

DMR Association statement on declaration of Model Classes:

“When test reports are formally verified by the DMR Association and a certificate of interoperability has been issued, or at a later date if appropriate, a manufacturer may declare, in a document signed by an authorized representative of the manufacturer, all products that belong to the Model Class of the product tested. All such products are eligible to be stated as interoperable by the manufacturer as if they had been used in the formal test process.”*

Motorola has determined by the criteria set out by the DMR Association that the following MOTOTRBO models are in the same Model Class as the **DP4801**
